

Organization of educational, educational and industrial, industrial and pre-graduation practices.

Practical training of students of the Kazakh National Agrarian Research University at the Department of "Transport Engineering and Technologies named after I.V. Sakharov" is carried out in accordance with the recommendations of the Ministry of Science and Higher Education of the Republic of Kazakhstan related to professional practice. The practice is organized within the framework of the educational process and provides for the coverage of students from the first year to graduation.

The procedure for completing the internship and its organization. The internship is conducted according to a transitional program under the guidance of representatives of the university and enterprise (organization), which is a real basis for acquiring practical skills for a future specialist and collecting the necessary materials for reporting.

Students receive individual assignments, keep a "practice diary" and report on its results. During the practice, interns can be hired for specific jobs.

The timeframe for the internship is determined by the curriculum and the agreement on its completion at the enterprise. During the internship, students are subject to the internal regulations and are registered at the enterprise.

Students can be sent to practice individually or as part of study groups. A responsible student is appointed from the group of student interns, who is an assistant to the heads of practice of KazNARU and the enterprise. Educational and methodological guidance of practice is carried out by a teacher of the department in close cooperation with a representative of the enterprise.

Direct supervision of student interns at their workplaces is provided by experienced specialists of the enterprise.

At the Department of "Transport Engineering and Technologies named after I.V. Sakharov", students undergo educational, educational and industrial, industrial and pre-graduation practices in the following educational programs:

1. 6B07104 – “Transport, transport technics and technologies”
2. 6B11301 – “Organization of transport, traffic and transport operation ”
3. 6B11302 – “Logistics (by industry)”

Post-course training courses are held at the department.

For students, in the 2024-2025 academic year, in addition to the contracts prepared for conducting previously existing industrial practice at the department, an agreement on industrial practice was concluded with 5 new institutions:
